Questo libretto è stato modificato con l'utilizzo di tecniche di **Comunicazione Aumentativa Alternativa (CAA)**.

La CAA comprende tutte le modalità di comunicazione che possono aiutare le persone che hanno difficoltà ad utilizzare i più comuni canali comunicativi. Non si identifica con "un" metodo, ma si tratta di un insieme di tecniche, strategie e tecnologie rivolte alla persona con bisogni comunicativi complessi, ai suoi interlocutori e al suo ambiente di vita.

In questo testo sono stati utilizzati simboli WLS (Widgit.Literacy Symbols).
Widgit Symbols © Widgit Software 2002- 2021 www.widgit.com www.auxilia.it

I simboli WLS sono disegni semplici, chiari, facilmente riconoscibili, adatti ad ogni età, perfetti per essere usati nella CAA ed estremamente utili in una grande varietà di situazioni comunicative.

È stato tradotto in simboli WLS dagli operatori della S.C NPI, sede di Fossano, in collaborazione con la S.C. di Pediatria di Savigliano, nel mese di settembre 2021.
